Android & iOS APPs for Smartphones & Tablets

With exclusive remote access for viewing live and recorded video from your security cameras on your Smartphone, tablet and computer, Mobile app is easy to use in just 3 steps – just download the free app for Android & iOS Smartphones, scan the NVR's QR code, and start viewing your cameras from anywhere with no hassles. You can also use a web browser on your PC or Mac computer to access your security cameras through the web portal for complete peace of mind and hassle-free operations.

Enjoy peace of mind no matter where you are

Remote access has never been easier. Whether you're using a smartphone, tablet, or computer, a click or two is all you'll ever need to check in.

See Whole day in a minute

Hours of activities can be compiled into a short video summary. Shows you all day's main events in span of no time. See your kids coming home, easily monitor all the visitors coming to your house, your garbage being collected, your kids getting up to their usual mischief – all in few minutes! Short summary footage of moving objects tells you what happened and when. Start to see more while watching less and experience the fastest way to stay connected.

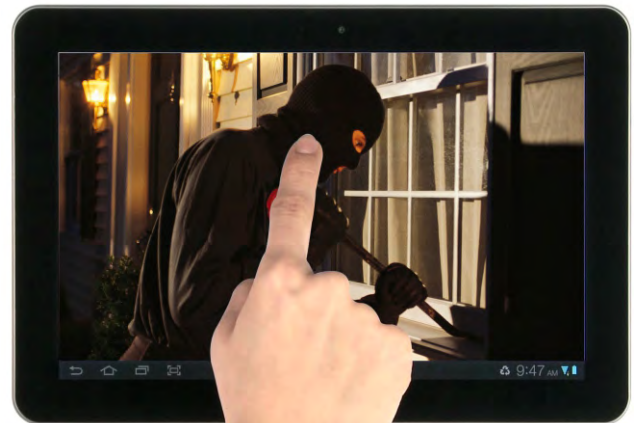

720P HD Wireless Video

Wisdom of perfect combination of easy to do setup and high performance with 720P wireless video security cameras. No need to run video cables now, our HD security cameras transmit 720P HD video wirelessly to the weatherproof receiver connected to the NVR. HD 720P recording resolution ensures smooth live-viewing and recording.

Smart Monitoring with Motion Detection etc

With our fast & busy lives, most homeowners never have time to review hours of daily footage. Our security systems come loaded with advanced features to help you monitor smarter. You can also choose to receive email alerts of motion events with snapshot attachments, or push notifications sent to your smartphone or tablet. Motion detection comes as a standard feature, allowing you to save hard drive space by only recording footage of moving objects.

Night Vision with Luminous Clarity

Never lose sight of the things that matter most with clear viewing around the clock. Strong security means safety at all times, including through-out the night. Secureeye state of the art IR LED night vision technology and an integrated automatic IR cut Filter ensure clear footage with colour presentation in all lighting conditions. Clearly identify objects up to 40 metres away in regular night conditions and up to 27 metres in pitch black conditions.

Weatherproof Wireless Cameras

Wireless convenience coupled with rugged persistence delivers one of our toughest wireless security cameras to date. The wireless receiver is also weatherproof rated for outdoor placement for even better wireless range in outdoors. Our robust, weatherproof cameras are IP66-rated to stand up against the elements. Fortified design makes this camera perfect for outdoor surveillance, while the compact housing is suitable for home monitoring applications as well.
